

# Brush Seal Solutions

for Computer Facilities

---

## Strip Brush + Holder

[for cable seals and cable management in computer desks, cabinets and data room floors]

Sealeze provides brush-based solutions for industrial applications ranging from sealing openings to guides on conveyor systems. Our strip brush is available in a broad range of sizes, with a variety of filament types, channels and holders to meet a range of application requirements. We manufacture brush to meet your specifications. For fitting office furnishings, we offer powder coated holders in colors to compliment any color and style.

Our in-house engineering team and design services are available to help you identify the exact requirements for your application. We can work with your engineers and CAD drawings to provide custom shapes and trim lengths.

**For more information about the complete line of Sealeze brush, holders and capabilities, visit us at [www.sealeze.com](http://www.sealeze.com)**

Brush sealing solutions for over 30 years.
