

## Press Release | February 2009

Title: Sealeze Partners with Energy Star

**Richmond, Virginia – February 23, 2008 - Sealeze, A Unit of Jason Incorporated** today announced a fundamental commitment to protect the environment by becoming an ENERGY STAR partner. Sealeze through its voluntary partnership with the U.S. Environmental Protection Agency's ENERGY STAR Program, will work to improve energy efficiency and fight global warming. Sealeze believes that a strategic, corporate energy management program will help us enhance our financial health and aid in preserving the environment for future generations.

"For over 30 years, Sealeze has helped energy-conscious facilities managers improve the energy efficiency of their buildings to save money and to reduce the emission of greenhouse gases by reducing their heating and cooling requirements" remarked Doug Mattice, Vice President of Sales and Marketing. He continued, "Today, Sealeze offers a range of products developed to economically seal cable access holes in data centers and computer facilities. Sealeze is proud to be an Energy Star Partner and we look forward to joining with Energy Star in communicating the importance and benefits of energy conservation now and to our future generations."

In partnership with ENERGY STAR, Sealeze will:

- Measure and track the energy performance of our organization's facilities where possible by using tools such as those offered through ENERGY STAR;
- Develop and implement a plan consistent with the ENERGY STAR Energy Management Guidelines to achieve energy savings;
- Help spread the word about the importance of energy efficiency to our staff, community and customers;
- Support the ENERGY STAR Challenge, a national call-to-action to help improve the energy efficiency of America's commercial and industrial buildings by 10 percent or more;
- Highlight our achievements with recognition offered through ENERGY STAR.

"Environmental responsibility is everyone's responsibility - and today I'm pleased Sealeze is taking this motto to heart," said EPA Administrator Stephen L. Johnson.

ENERGY STAR was introduced by EPA in 1992 as a voluntary, market-based partnership to reduce greenhouse gas emissions through energy efficiency. Today, the ENERGY STAR label can be found on more than 50 different kinds of products, new homes and commercial and industrial buildings. Products and buildings that have earned the ENERGY STAR designation prevent greenhouse gas emissions by meeting strict energy-efficiency specifications set by the government. In 2007, Americans, with the help of ENERGY STAR, saved about \$16 billion on their energy bills while reducing the greenhouse gas emissions equivalent to those of 27 million vehicles.

### **About Sealeze, A Unit of Jason Incorporated**

Sealeze provides a broad range of products specifically designed to improve the thermal efficiency of buildings, reduce heating and cooling expenses, and improve personnel comfort and safety.

Sealeze CoolBalance™ with Dyna-Seal™ technology cable management seals close gaps in raised floors. More effective than vinyl or rubber seals, Sealeze brush consists of thousands of filaments that form a solid wall that closes gaps with a flexible and effective seal. Made from the finest nylon filament materials in a variety of shapes and sizes, CoolBalance cable management products include: in-floor seals, through-wall seals and circle seals.

Sealeze is a unit of the Jason Brush Group which includes Osborn International North America and manufacturing and sales offices throughout the world that are part of Osborn International, International Operations. All together, the Jason Brush Group is the world's largest brush manufacturing organization.

Sealeze is an ISO 9001:2000 certified manufacturer.

Sealeze®, Dyna-Seal™ and CoolBalance™ are trade marks of Sealeze, A Unit of Jason Incorporated.
